

# 7/8 feet high Elite Cantilever Swing - 1 Bay 1 Cantilever

Meets National Standards for: ✓ ASTM F1487-17 ✓ CPSC Guidelines #325

## Product Description

The Elite Cantilever Swing with 1 Bay and 1 Cantilever is great for letting people of different sizes and age groups to swing together on the same swing set. Its design includes an additional swing mounted on a protruding post. This post is set lower, so that the swing does not swing as far or as quickly. It is ideal for preschool aged children, which is why it comes with a bucket seat designed to safely support them. Young children can enjoy the lower cantilever swing, while their parents or older siblings use the swings in the main bay. The two traditional swings feature durable black rubber belt seats with steel inserts to make them comfortable as well as sturdy. The chains and hangers are also designed with safety in mind, and galvanized to resist rust. The legs, top rail, and cantilever are extra-large so that they can support tremendous amounts of weight.
